

Location: **Xi'An Xianyang International Airport (XIY), Shaanxi, China**
Client: **China West Airport Group**
Projects: **Multiple** (Led by SPS key staff while employed by others)

Numerous SPS staff previously with others have worked on multiple projects for the West Airport Group at XIY.

XIY services directed by SPS CEO, when employed by others as CEO and functioning as its China Group Leader, with support by other key staff including SPS (Shanghai) Ltd. President and Xi'an Client Officer include:

- **XIY – Xi'An Xianyang International Airport**
 - Master Planning
 - Interim International Terminal Concept Planning and Design
 - Phase III Expansion and Development
 - East Terminal/GTC Expansion and Development

Location: **Xi'an, China**
Airport: **Xi'an Xianyang International Airport (XIY), Shaanxi, China**
Client: **China West Airport Group**
Project Title: **Xi'An Xianyang International Airport Master Plan**
Year: **2009 and 2014**
Key Staff: **Jeff Thomas, Huang Xiang, Qianlin Li, Lin Ge, Jing Pei, Feihang Du, Zhenlian Zhang , James Yang, (while employed by others)**

Mr. Thomas, while employed by others as CEO and China Group Leader , along with Mr. Huang Ms. Li and other SPS staff, provided leadership and professional expertise to the West Airport Group for the master plans. The now approved master plan concept is planned to provide the capacity to handle over 100MAP with two terminal areas and 5 parallel runways. The plan also included an expanded new northwest cargo precinct and updated land use planning and support facilities plans.

Mr. Thomas, Mr. Huang, Ms. Li led their prior company team, partnered with the North West Design Institute/ China Architectural Design Institute team effort to achieve the winning design concept for Xi'an Xianyang International Airport's East Terminal/Ground Transport Centre (GTC) in the historic city of Xi'an, China. The plan formed under the direction of Mr. Thomas was found by the judges to be the "most balanced, comprehensive, compatible and flexible scheme."

The program developed for the new terminal and GTC will include more than 1 million square meters of floor area, as well as an additional 400,000 square meters of structured vehicle parking. The Team has continued to advise the West Airport Group on the on-going refinement of this complex multi-modal terminal complex.
