

Zhang Zhenlian Managing Consultant

SPS

Overview

Ms. Zhang Zhenlian has extensive experience in the terminal and integrated commercial development design and planning. During worked in East China Architectural Design & Research Institute as director of commercial development, she presided over several large-scale commercial complex projects as chief design officer. During the period of L&B, Ms. Zhang participated in the preliminary design of the Satellite Hall of Shenzhen Bao'an International Airport, and the International Design Competition of the T3 terminal area and terminal building of Xining Caojiabao Airport, and the Air China Consultation at Beijing Airport, mainly engaged in the planning and design of commercial complex, airport terminal building, terminal area and landside. Based on the series of cooperated projects related to airports and commercial work including Shanghai Hongqiao Transport Centre, Hongqiao East Traffic Center P5P8 garage, Jinan Luneng Business Center, Nanjing Yurun Headquarters Office, Kunming Runcheng Second Avenue, Shanghai Fuxing Road SOHO and Shenzhen Satellite Hall etc., Ms. Zhang has accumulated rich experience in functional layout, passenger flow, commercial flow and positioning. As a Master of Architecture, Ms. Zhang Zhenlian is good at studying the relationship between commercial complex and terminal building and environment comprehensively in the planning process, to make the whole planning and design develop towards the direction of humanization and ecology.

Project Experience

Shanghai Hongqiao Transportation Centre-Preliminary design, including the West Terminal, East Traffic Plaza, for the terminal building facade and interior space design and construction drawings. Hongqiao East Transportation Center P5P8 Parking Garage Project - as the design director - fully control the building's streamline, function, shape to the completion of the construction drawings. Commercial Complex Project - Kunming Runcheng Second Avenue Project - Design Director - involves commercial, office, hotel, apartment and other functions, the overall control of the building streamline, function, shape, landscape to the completion of the construction drawings. Other commercial complex project including Shanghai Fuxing Road SOHO project, as professional person in charge Ms. Zhang involved retail, office functions design, and in charge with the control of building streamline, function to the completion of the construction drawings, and this project won the third prize in Shanghai survey and design. The main airport planning projects including Shenzhen Bao'an International Airport Satellite Hall Project - Initial design phase involved passenger boarding bridge, service lane and building links, the vertical relationship between service lane and apron. International Design Competition of T3 Terminal Area and Terminal Building of Xining Caojiabao Airport – Near/Long-Term Graphic Design of T3 Terminal Building, Graphic Design of Integrated Transportation Centre. She was responsible for the graphic renovation and expansion of the West terminal area of the Air China at Beijing Airport consultation project.

Professional Contributions

As the leader of the commercial subject, Ms. Zhang have worked on the commercial workstation for many years. Based on the research results she wrote the book *Design of Large Commercial Architecture* which was published by China construction industry press and widely acclaimed in the industry.

Licenses

first-class registered architect/ Senior Engineer designation

Education

Master of Engineering, Architecture, Tianjin University

Zhang Zhenlian Project Manager

SPS

Representative Projects

A partial listing of airports Ms. Zhang has personally served as follows:

- **Shanghai Hongqiao Transportation Centre**
 - Master plan including terminal, transportation centre planning
 - Terminal functional layout
 - Architectural modelling design
 - Landscape planning and design
 - Interior design
- **Shanghai Hongqiao Transportation Centre P5P8 Parking Garage**
 - Transportation centre master planning
 - Functional layout and transport flow
 - Architectural modelling design
 - Landscape planning and design
 - Architecture interior design
- **Satellite Hall design of Shenzhen Bao'an International Airport**
 - Passenger boarding bridge
 - Connection between service lane and buildings
 - Review of the vertical connection between service lane and apron
- **Air China Consultation at Beijing Airport**

Terminal plane renovation of west terminal area

 - Terminal plane expansion of west terminal area
- **T3 terminal area and terminal Building design of Xining Caojiabao Airport**
 - Near/long term plane design of T3 terminal
 - Plane design of integrated transportation centre
- **The 2nd Avenue of Runcheng Kunming**
 - Retail complex master planning
 - Functional layout and transport flow
 - Architectural modelling design
 - Landscape planning and design
 - Architecture interior design
- **Fuxing Road SOHO , Shanghai**
 - Retail complex master planning
 - Functional layout and transport flow
 - Retail building plane design
